

# STERILIZING CABINETS

## OPERATING PRINCIPLE:

The bacteria is sterilised by ultraviolet rays.

## L'HYGIENE :

Sloped top and bottom preventing any retention of water or dust. It is impossible to lay objects on the cabinet.

Removable stainless steel rack: it is dishwasher proof and easy cleaning of inside of cabinet.

## SAFETY:

The cabinet is fitted with a device to cut out the light when the door is opened: users are not exposed to UV rays. The stop holds the knives of cutter blades, thereby limiting any risks of them falling out and therefore injury.

Ref : 806 424

### THE RANGE ALSO INCLUDES :

- **20-knife cabinet**  
with grid  
ref. 806 421
- **10-knife cabinet**  
with magnetic bar  
ref. 806 422

**All the cabinets are also available with lock and key.**

Ref : 806 423

## EFFICIENCY :

Thanks to the rack, no part of the knife's blade is in contact with a surface likely to obstruct the efficiency of the rays.

The stop is also provided to hold non-magnetic utensils.

The cabinet is deep enough to allow for cutting disks (up to 157 mm) to be sterilised.

## EYE-CATCHING:

The radiused vertical edges give the cabinet a modern edge blending in with the Tournus stainless steel range.
