Fast.
Efficient.

MKN Electric Salamander

Vario Intelligence

"The Salamander Vario Intelligence impresses me with its extremely fast heating up time and the touch screen operation."

Intelligence which pays off ...

How you can save money and reduce CO₂

The MKN electric Salamander Vario Intelligence is equipped with an extremely intelligent control system: By means of an installed contact switch for plates the salamander is only switched on when it is actually required. This saves more than 2,200 euros operating costs** and approx. 4.8 tonnes CO₂ per year.*

Top Features

- Reduced heat output in the kitchen as the salamander does not have to remain in operation continuously
- Equipped with contact switch for plates: This switches the heating elements on and off when plates are put in place or taken out of the appliance
- Heating elements continuously adjustable in height: They can be adjusted in height to 25 mm above the product
- User-defined programme selection is possible
- High quality glass touch screen display

Technical Data

External dimensions	570 x 590 x 518 mm
Connected load	4.5 kW 3 NPEAC 400 V or 3.5 kW 1 NPEAC 230 V
Accessories	Drip tray + grill grid

* compared to conventional salamander appliances

** conventional salamander appliance: 4.5 kW/in continuous operation/7 hours per day/312 operating days per year/26.09 cents per kWh. MKN Salamander Vario Intelligence: 4.5 kW/total operating time 1 h/day = 30 applications per day, each lasting 2 minutes resp./26.09 cents per kWh.
