

1.9L Glass Server with Black Handle | D068

- Comfortable Grip**
Sloped handle design with thumb rest is sufficiently balanced and has ample space to keep hot bowl away from working hands.
- No Sealants or Glues**
Patented interlock mechanism provides long term performance without the need for unreliable glues or sealants.
- Polypropelene Handle**
Impact resistant, breakproof, chemical reistant and dishwasher safe.

Strong and comfortable in your hand, the FETCO glass server is easy-to-handle and a breeze to clean.

Produced from a highly-polished mold with superior materials, these beautiful glass servers are finished with a proprietary annealing process resulting in a consistent wall thickness throughout the entire surface.

The sloped handle design with thumb rest is comfortable and sufficiently balanced for reaching out during table service. The polypropelene handle construction is impact resistant, breakproof, chemical resistant, dishwasher safe and developed with ample space to keep the hot bowl away from busy, working hands.

Attaching the handle to the bowl is a patented interlock mechanism that provides long term performance without the need for unreliable glues or sealants that can deteriorate over time.

Available in packs of 3ea.
